

KING COUNTY  
Strategic Technology Plan – Appendix

---

*Table of Contents*

I.	Strategy Cost Breakdown.....	209
	Strategy Cost Assumptions.....	209
	Strategy Summary Cost Table .....	211
A.	Service Delivery.....	212
	A1. Utilize service-level agreements as a standard way of doing business.....	212
	A2. Reorganize the help desk function around a more centralized, streamlined, and coordinated model.....	213
	A3. Utilize the State of Washington's Digital Academy to promote learning.....	214
	A4. Use the Internet as a primary mechanism to deliver public information and services.....	215
	A5. Promote and support the development of the employee intranet and partner extranet to improve information services and business process support. ....	216
B.	Operations.....	217
	B1. Establish a comprehensive asset management function.....	217
	B2. Develop standard operating procedures to guide all agencies' technology staff.....	218
	B3. Strengthen system security.....	219
	B4. Strengthen business continuity capabilities.....	220
C.	Architecture (web, applications, and infrastructure) .....	221
	C1. Standardize technology including infrastructure, hardware, and applications software. ....	221
	C2. Standardize Web-based technology used on the intranet, Internet, and extranet.....	222
	C3. Standardize County technical approach for application integration .....	223
	C4. Purchase and integrate top quality commercial packaged software wherever possible and cost effective – and with minimal customization.....	224
	C5. Consolidate hardware around the County. ....	225
	C6. Use broadband technology and a fully integrated PBX architecture as the future centerpiece to converge data, voice, and video transport.....	226
	C7. Institute Countywide best practices for enterprise data management.....	228
	C8. Design and implement a common architecture to integrate workflow between Law, Safety, and Justice agencies. ....	229
	C9. Implement a standardized integrated portfolio of enterprise Financial and HR/Payroll applications. ....	230
	C9. (Continued) Implement a standardized integrated portfolio of enterprise Financial and HR/Payroll applications. ....	231
D.	Management and Organization .....	232
	D1. Institutionalize performance measurement for technology.....	232
	D2. Develop technology design/plans for significant initiatives and projects. ....	233
	D3. Establish a comprehensive project management program. ....	234
	D4. Reorganize technology functions around the County.....	235
	D5. Strengthen technology management and delivery capabilities through specialized training. ....	236

**Appendix**

II.	Agency Goals Matrix .....	237
III.	Needs Summary .....	267
	A. Introduction .....	267
	B. Summary Needs .....	267
	1. Service Delivery .....	267
	2. Operations .....	268
	3. Architecture (web, applications, and infrastructure) .....	270
	4. Management and People .....	274
	5. Funding .....	276
IV.	Technology Inventory Summary .....	279
V.	Peer Review Results .....	327
VI.	Measurement Report .....	335
	A. Context .....	335
	B. Purpose .....	335
	C. Measurement Principles .....	336
	D. Components .....	336
	1. Technology Lifecycle .....	336
	2. Measurement .....	338
	3. Total Cost of Ownership .....	340
	E. Specific Measures .....	342
	1. Project Measures .....	342
	2. Program and Countywide Measures .....	343
	F. Project Measurement Tools .....	344
	1. Overview .....	344
	2. Project Proposal Form .....	346
	3. Status Report .....	347
	4. Post Project Review .....	348
	5. Value Measurement Review .....	349
	G. Program and Countywide Measurement Tools .....	350
	H. Form Samples .....	351
	Supplemental Materials .....	371
	Glossary of Terms and Abbreviations .....	373
